<110>	Has your company received its ETC certification from the FCC?	(yes / no)	<input type="radio"/> <input checked="" type="radio"/>
<111>	If your answer to Line <110> is yes, do you have an existing §54.202(a) "5 year plan" filed with the FCC?	(yes / no)	<input type="radio"/> <input type="radio"/>

If your answer to Line <111> is yes, please file a progress report, on line <112> delineating the status of your company's existing § 54.202(a) "5 year plan" on file with the FCC, as it relates to your provision of voice telephony service.

<112> Attach Five-Year Service Quality Improvement Plan or, in subsequent years, your annual progress report filed pursuant to 47 C.F.R. § 54.313(a)(1). If your company is a CETC which only receives frozen support, your progress report is only required to address voice telephony service.

613011ak112.pdf

Name of Attached Document

Please select the appropriate responses below (Yes, No, Not Applicable) to confirm that the attached document(s), on line 112, contains a progress report on its five-year service quality improvement plan pursuant to §54.202(a). The information shall be submitted at the wire center level or census block as appropriate.

- <113> Maps detailing progress towards meeting plan targets
- <114> Report how much universal service (USF) support was received
- <115> How much (USF) was used to improve service quality and how support was used to improve service quality
- <116> How much (USF) was used to improve service coverage and how support was used to improve service coverage
- <117> How much (USF) was used to improve service capacity and how support was used to improve service capacity
- <118> Provide an explanation of network improvement targets not met in the prior calendar year.

Select the appropriate responses below (Yes, No, Not Applicable) to note compliance as a recipient of Incremental High Cost support, High Cost support to offset access charge reductions, and Connect America Phase II support as set forth in 47 CFR § 54.313(b),(c),(d),(e). The information reported on this form and in the documents attached below is accurate.

Incremental Connect America Phase I reporting

- <2010> 2nd Year Certification 47 CFR § 54.313(b)(1)(i) - Note that for the July 1 2016 certification, this applies to Round 2 recipients of Incremental Support
- <2011> 3rd Year Certification 47 CFR § 54.313(b)(1)(ii) - Note that for the July 1 2016 certification, this applies to Round 1 recipients of Incremental Support
- <2022> Recipient certifies, representing year two after filing a notice of acceptance of funding pursuant to 54.312(c), that the locations in question are not receiving support under the Broadband Initiatives Program or the Broadband Technology Opportunities Program for projects that will provide broadband with speeds of at least 4 Mbps/1Mbps - 54.313(b)(2)(i). Round 2 recipients only.
- <2023> The attachment on line 2024 includes a statement of the total amount of capital funding expended in the previous year in meeting Connect America Phase I deployment obligations, accompanied by a list of census blocks indicating where funding was spent. This covers year two - 54.313(b)(2)(ii). Round 2 recipients only.
- <2024A> Round 2 Recipient of Incremental Support?
- <2024B> Attach list of census blocks indicating where funding was spent in year two - 54.313(b)(2)(ii). Round 2 recipients only.
- <2025A> Round 1 or Round 2 Recipient of Incremental Support?
- <2025B> Attach geocoded Information for Phase I milestone reports (Round 1 for year three and Round 2 for year two) - Connect America Fund , WC Docket 10-90, Report and Order, FCC 13-
- <2015> 2016 and future Frozen Support Certification 47 CFR § 54.313(c)(4)

4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission’s public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year.	Name of Attached Document Listing Required Information	
---	--	--

Broadband Deployment Locations – FCC 14-98 (paragraph 80)

4004a. Attach a list of geocoded locations to which broadband has been deployed as of the June 1st immediately preceding the July 1st filing deadline for the FCC Form 481.	Name of Attached Document Listing Required Information	
--	--	--

4004b. Attach evidence demonstrating that the recipient is meeting the relevant public service obligations for the identified locations. Materials must at least detail the pricing, offered broadband speed and data usage allowances available in the relevant geographic area.	Name of Attached Document Listing Required Information	
--	--	--

Interior Telephone Company

100: Service Quality Improvement Reporting

112: Annual progress report pursuant to 47 CFR 54.313(a)(1).

Interior Telephone Company (ITC) is an ETC designated by the Regulatory Commission of Alaska. ITC hereby submits its annual progress report demonstrating progress toward meeting targets identified in the five-year network improvement plan submitted in last year's annual 481 filing.

113: Maps detailing progress towards meeting plan targets.

In its *March 5, 2013 Order*, the Commission stated, "We encourage rate-of-return carriers to explain in their five-year plans what criteria the carrier will use to determine whether a request for broadband is reasonable and how the carrier will decide which areas are feasible to extend terrestrial broadband service to, and which areas are not feasible to serve with terrestrial technologies, given current funding levels."¹ In its Form 481, 54.313 report filed July 1, 2015 Interior Telephone Company (ITC) provided baseline maps detailed, at the wire center level, showing broadband capability throughout each area. During the 2015 calendar year there was no coverage change in the service area. ITC continues to upgrade its facilities and provision equipment for efficient use of its network.

Interior Telephone Company serves the combined exchange area(s) of:

Cold Bay	Port Lions
Fort Yukon	Sand Point
Galena	UnAlaska
Iliamna	Cooper Landing
King Cove	Seward/Moose Pass

ITC exchange areas, with the exception of Seward/Moose Pass and Cooper Landing are not connected by roads and are only fed by satellite backhaul facilities. Seward/Moose Pass and Cooper Landing have fiber middle mile access and currently support the broadband service level of 4Mbps downstream/1Mbps upstream. The village of Iliamna has both satellite and fiber middle mile access but is not connected by roads and is not able to support the broadband service level because of cost prohibitive backhaul facilities². Iliamna is able to support the broadband service level of 1Mbps downstream/256kpbs upstream. The Commission has acknowledged this issue in the 3rd Order on Reconsideration the Federal Communications Commission at Paragraph 46³ and in reference to Five-Year Build Out Plans the March 5, 2013 Order FCC DA 13-332 at Paragraph 114.

¹ *March 5, 2013 Order* at Para. 10.

² FCC 12-52 paras. 45-46

³ 46. We appreciate the concerns raised by the Alaska Rural Coalition and ACS that it may not be cost-effective to serve certain customers due to the high cost of backhaul. Rather than granting a blanket exemption of the broadband FCC Form 481 Program Year 2017

All of ITC's other villages served only by satellite backhaul, are able to support the broadband service level of 1Mbps downstream/256kpbs upstream. ITC continues to seek economically sound solutions to address the provisioning of required broadband speeds given the extremely high costs of middle mile transport.

114: Report how much universal service (USF) support was received.

Section 254(e) of the Communications Act of 1934, as amended requires ETCs to use Universal Service support ("USF") "only for the provision, maintenance, and upgrading of facilities and services for which the support is intended."⁵ Pursuant to Section 54.314 of the FCC's rules, in order for state-designated ETCs to receive USF for the coming year, states must annually file certifications by October 1 stating that all federal high-cost support provided to such carriers within the state "was used in the preceding calendar year and will be used in the coming calendar year only for the provision, maintenance, and upgrading of facilities and services for which the support is intended."⁶ In its *USF/ICC Transformation Order*, the FCC clarified that prior to making the Section 254(e) certifications, states should conduct a "rigorous examination of the factual information" contained in the annual Section 54.313 reports, of which the five year network improvement plan and annual progress reports are a part, in determining whether they can certify that carriers' support has been used and will be used only for the purpose for which the support was intended.⁷ The FCC said that it would also use the reports to verify certifications filed by ETCs that are not state-designated.⁸ In this context, the Commission stated, "[i]n light of the public interest obligations we adopt in this Order, a key component of this [Section 254(e)] certification will now be that support is being used to maintain and extend modern networks capable of providing voice and broadband service."⁹

obligations established for rate-of-return companies in the USF/ICC Transformation Order, we clarify, as the Alaska Rural Coalition requests, that our current rules provide sufficient flexibility to take into account any unique circumstances that may impact the ability of rate-of-return companies to extend broadband to their customers, including backhaul costs. As the Coalition notes, rate-of-return carriers are required to provide service meeting the specified characteristics on reasonable request, which, the Commission explained in the Order, was an obligation similar to the voice deployment obligation many of those carriers were already subject to. This obligation, enforced in the first instance by the relevant ETC-designating authority (generally the state), permits these entities to take into account backhaul costs or other unique circumstances that may make it cost-prohibitive to extend service to particular customers, in Alaska or any other area. We intend to carefully monitor developments in this regard and will consider making further clarifications or revisions if necessary.

⁴ 11. The Bureau does not expect a rate-of-return carrier to plan to build out terrestrial wireline broadband service to all locations within its study area. The Commission has recognized that there are some areas of the country where it is cost prohibitive to extend broadband using terrestrial wireline technology, and that in some areas satellite or fixed wireless technologies may be more cost effective options to extend service. Indeed, we are aware anecdotally that rate-of-return carriers today use a mix of technologies to serve their customers. For that reason, we expect rate-of-return carriers to develop plans that reflect the cost characteristics of their service territories and current funding levels, setting forth what sort of broadband service build-out is reasonable over the five-year time period.

⁵ 47 U.S.C. § 254(e).

⁶ 47 C.F.R. § 54.314(a).

⁷ See *USF/ICC Transformation Order* at Para. 612.

⁸ *Id.*

⁹ *Id.* (emphasis supplied).

The USF received by Interior Telephone Company (ITC) and other incumbent rural telephone companies are, in fact, an integral part of the recovery of expenditures of rural incumbent local exchange carriers incurred in the provision, maintenance and upgrading of their provision of facilities and services for which the USF is intended. ITC depends upon its receipt and utilization of federal universal service support to provide rural telephone customers with affordable and quality voice and broadband services.

The instructions to the Form 481 require annual progress reports which must include the total amount of USF received. USF received in 2015 is shown below.

SUPPORT AMOUNT RECEIVED 2015	
Federal High Cost Loop Support	\$1,015,238
Federal Interstate Common Line Support	\$1,619,616
Federal Local Switching Support	\$0
Federal Connect America Fund (CAF) Support	\$979,986
Federal Lifeline/Linkup Support	\$103,967
State Support	\$1,137,903
Public Interest Pay Telephone Support (PIPT)	\$2,207
Lifeline/Linkup Support	\$12,754
Carrier of Last Resort Support	\$410,321
Common Carrier Line Support	\$712,621
Total Federal and State Universal Service Support	\$4,856,710

USF support will continue to be included in ITC's current revenue accounts and forward looking projections. Revenues, in the aggregate, are used for both capital expenditures as well as operating expenses. The instructions to the Form 481 also requires the total amount of USF received is "broken out separately by the amount spent on capital expenses and the amount spent on operating expenses."¹⁰ ITC does not segregate USF for purposes of capital and operating expenditures, USF is expended in the same proportion as all other revenue.

Total company regulated expenditures is broken out by the amount spent on capital expenditures and the amount spent on operating expenses in terms of the Part 32 categories.

Capital Expenditures and Operating Expenses

¹⁰ Instructions for Completing FCC Form 481, OMB Control No. 3060-0986 (High-Cost), OMB Control No. 3060-0819 (Low-Income), February 2015, Line 112

115-117: How (USF) was used to improve service quality/coverage/capacity.

Interior Telephone Company (ITC) utilizes federal universal service funds received for the provision and maintenance of the core services, to include both voice and broadband services, for which the support is intended. ITC also uses universal service funds as a reduction to its local service costs (normalized local revenue requirement) thereby keeping its services available at just, reasonable, and affordable rates pursuant to the universal service goals as set forth in the Telecommunications Act at Section 254 (b) (3).

When the Commission adopted its five-year plan requirements for FCC-designated ETCs in its *2005 ETC Order*, it clarified that service quality improvements in the five-year plan “do not necessarily require additional construction of network facilities.”¹¹ Accordingly, the network improvements targets may be projects related to the expansion of the network (one or multiple services), projects related to updating technology to accommodate new services or higher bandwidth or maintenance projects, such as to reduce trouble reports or replace outdated equipment. Additionally, in some cases, the projects may be ones that improve or upgrade the entire network rather than discrete areas within a study area or they may be ones that are ongoing projects that have no specific start and completion dates.

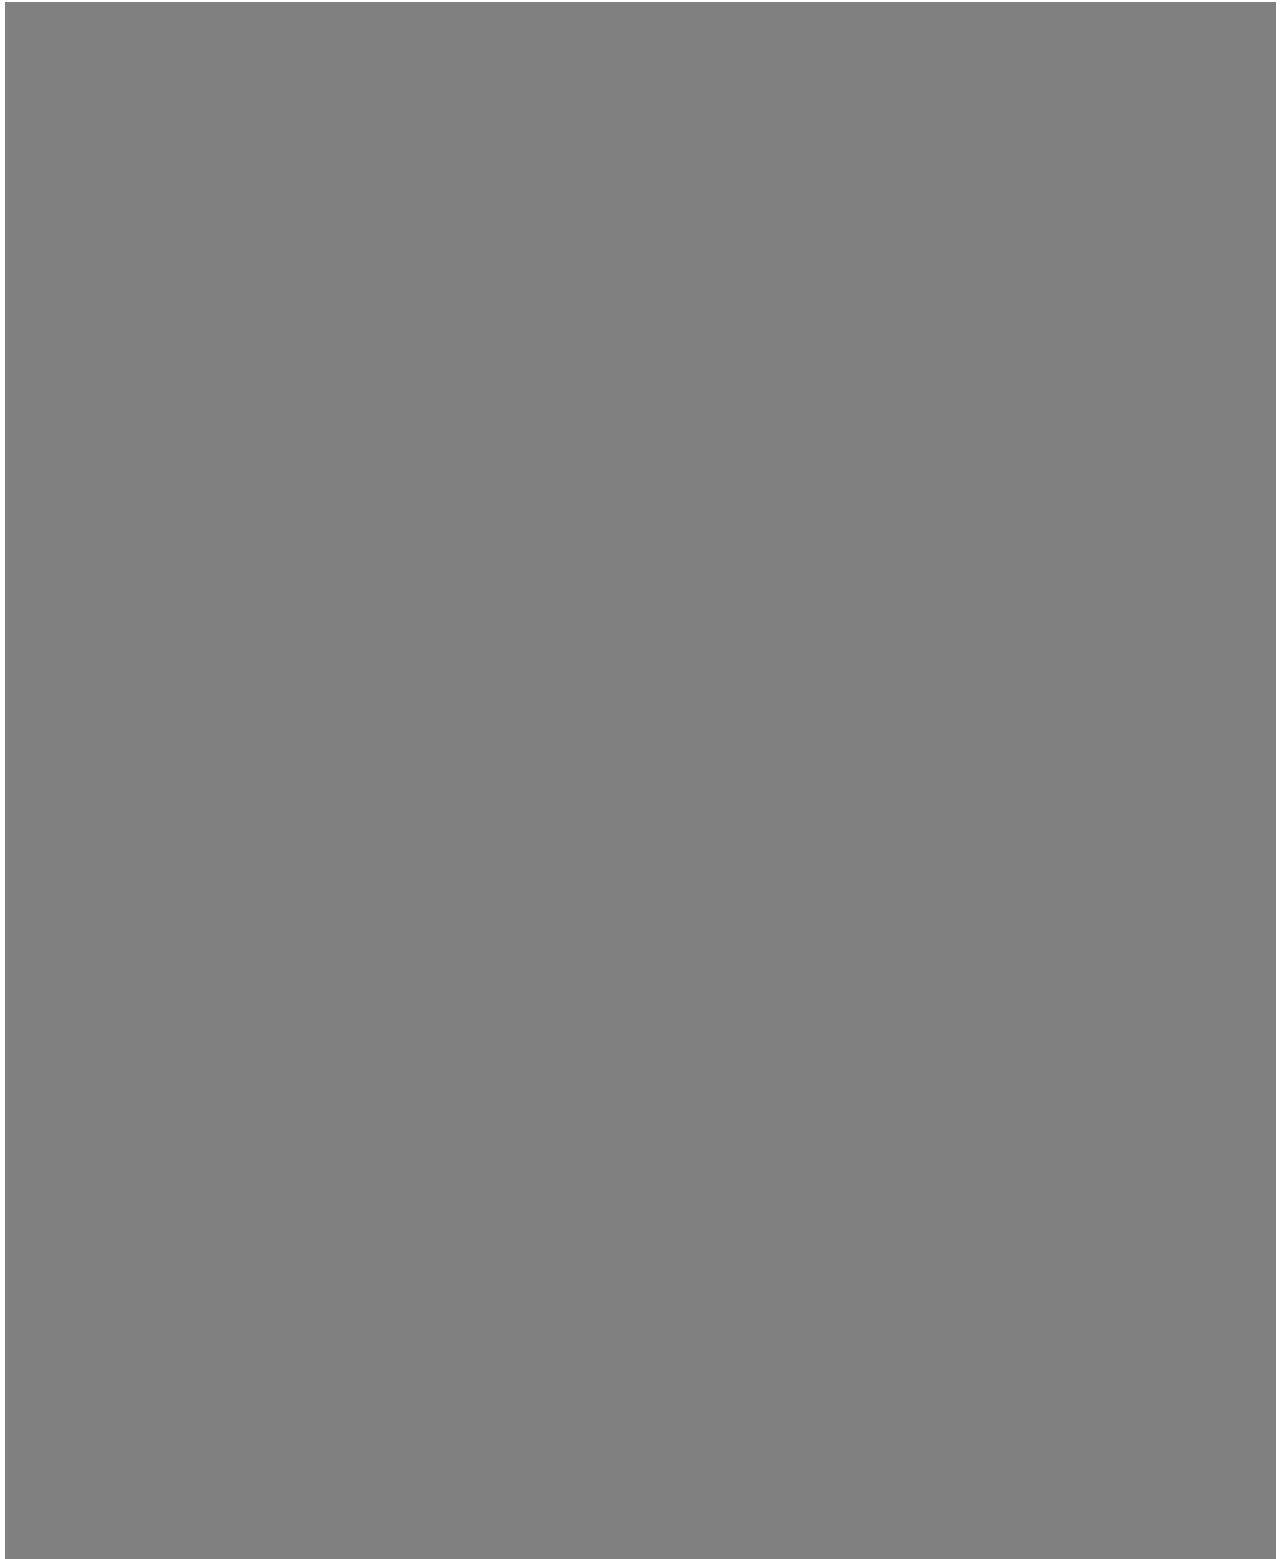

ITC operates under a very short construction season with exchanges in remote areas of Alaska. Provisioning of telecommunications services can be extremely challenging and expensive. Compared to remote parts of the 48 contiguous states, voice and broadband services in Remote Alaska must traverse longer distances, frequently without roads or power infrastructure to support building or operating the facilities. Supplies (including fuel for generators) must be brought in by airplane or barge, where rivers are not frozen, and dealing with the harsh Alaska climate can impact the scheduling of projects.

This progress report details projects for the provision, maintenance, and upgrading of facilities that support both voice and broadband services to subscribers throughout the service area. In the project detail, expenditures for network improvements sometimes involve service quality, service coverage, and service capacity as an integrated network improvement project and are not mutually exclusive from one another.

Some network improvement targets detailed in the 5-year network improvement plan scheduled for 2015 are completed and some have been modified to accommodate current circumstances. The progress report submitted this year addresses calendar year 2015.

¹¹ *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) (“*2005 ETC Order*”).

2015 Network Improvement targets:

This is in addition to the normal operations and maintenance that ITC incurred in 2015 to operate and maintain the local exchange telephone network. ITC will continue to operate, provision, maintain, and extend the telecommunications network to provide both quality voice and broadband service to all subscribers within its study area.

118: An explanation of network improvement targets not met in the prior calendar year.

Any network improvement targets not met during calendar year 2015 have been identified and modified to meet current circumstances. See detail above showing progress of all network improvement targets in the 5-year network improvement plan scheduled for 2015. The Five-year network improvement plan comprises years 2015-2019.

Interior Telephone Company

500: Service Quality Standards & Consumer Protection Rules Compliance

510: Interior Telephone Company certifies that it is in compliance with applicable consumer protection and service quality standards as set forth in Alaska Administrative Rules 3 AAC 53.450 and consumer protection rules as defined in 47 CFR Part 64 Subpart U, Customer Proprietary Network Information and the Federal Trade Commission Red Flag rules to prevent identity theft. A manual for each of those programs is in place and is part of the employees' handbook. Employee training is conducted and new hires are instructed on the programs as required by their job functions.

Interior Telephone Company

600: Functionality in Emergency Situations

610: Interior Telephone Company certifies that it has and will continue to take steps to remain functional in emergency situations in compliance with requirements set forth in 47 CFR 54.202(a)(2).

Interior Telephone Company has ten telecommunication local exchanges. It uses (central office) switches from several different manufacturers (vendors) to provide the service. The manufacturers include Redcom, Metaswitch, and Genband (formerly Nortel). Additionally, several of its serving areas have remote nodes. The node manufacturers include Calix (formerly Occam) and Tellabs (formerly AFC). Each central office and interconnecting network equipment site contains provisions for reserve power to keep all equipment operating without interruption for at least eight hours at the busy-hour load following any failure of the primary electric power source. All switches and nodes have 8 hour battery back-up. Additionally, the switches have back-up generators which will provide power indefinitely.

At all of Interior Telephone Company's local exchange service areas, it provides a stand-alone switch (not connected to other central offices) directly connected to two separate IXCs. There are separate cable routes to each IXC in 9 of the 10 locations. If either route is damaged access to long distance is attainable through a dial around process. At one of its local exchange service areas, it connects to IXCs on a SONET ring. All of Interior Telephone Company's switches are non-blocking blocking and capable of handling traffic spikes resulting from emergency situations.

Interior Telephone Company has established procedures to be followed by its employees in the event of emergencies.

Interior Telephone Company

920: Tribal Engagement Document

Tribal lands in Alaska are defined differently than what typically is used to describe tribal lands and tribal authority in the contiguous 48 States. Alaska Native Regions were not carved out of existing reservations and occupy a different legal status than allotments which are defined as Indian Country under 18 USC Sec. 1151. They include all Alaska Native Regions established pursuant to the Alaska Native Claims Settlement Act. (ANCSA), 43 U.S.C Sec. 1601. ANCSA lands do not qualify as Indian Country. This Act extinguished the Alaska tribes' aboriginal title to land, while creating village and regional corporations that received title to certain lands within 12 geographic regions of the state. The shareholders of those ANCSA corporations are primarily tribal members and their descendants. The ANCSA regions consist of the entire State of Alaska and are defined as tribal lands.

TelAlaska, Inc.'s subsidiary, Interior Telephone Company (ITC) is a public utility corporation (Certificate No. 165) providing local exchange telephone service to the following communities: Cold Bay, Cooper Landing, Fort Yukon, Galena, Iliamna, King Cove, Port Lions, Sand Point, Seward, Moose Pass and Unalaska. Three of these communities are located on a road system, the rest are remote isolated communities spread across a large area of the State: from 800 miles west of Anchorage on the Aleutian Islands, to over 400 miles north of Anchorage near the Arctic Circle on the Yukon River.

921: Needs Assessment and Deployment Planning with Focus on Anchor Institutions

ITC strives to work in conjunction with its Alaskan Native community leaders and anchor institutions to assess, plan and deploy telecommunication facilities in its exchange service areas. During 2015, ITC undertook the following steps to communicate with its Alaskan Native community: Using its assembled list of native leaders with contact information for all of federally recognized tribes in ITC's serving areas from the Federal Register, Dave Goggins, President and General Manager initiated direct contact via phone calls to native leaders, covering each of ITC's exchanges. The purpose of these calls was to discuss and describe the Tribal Government Engagement Obligation as reported in the July 19, 2012 FCC Public Notice and open or continue a dialogue with the local leaders. During these direct conversations, the native community leaders offered direct and candid feedback on the quality of ITC's voice and broadband services to their community as well as what if any concerns they may have regarding new service opportunities. Mr. Goggins shared ITC's plans on future network activity and provided the native leaders with direct contact information for any future discussions.

922: Feasibility and Sustainability Planning Tribal Land Network

See narrative response to 921.

923: Marketing Services in a Culturally Sensitive Manner

Interior Telephone Company staff has strived to devise marketing strategies that are culturally sensitive. Given that all of ITC's customers reside on Alaska Native Region lands, the intent of its marketing strategy is to appeal to, and be appropriate for, Alaskan Natives. ITC management and staff have attended regularly scheduled monthly community events and meetings. In addition, ITC staff work directly with local leaders and residents in the communities, which keeps ITC's marketing message continually fresh, relevant, and sensitive to the culture of those currently served and to be served in the future. Marketing materials also feature photos of Alaska Native families rather than purchased images from stock photo companies.

924: Rights-of-Way Processes

ITC obtains Right of Way permits from the State of Alaska, Federal agency or tribal organization which has the legal ROW authority over these lands. Local village administrations are also contacted as applicable before accessing roads, easements or private property, informed of the intended project and offered opportunities for feedback. ITC engineers design plans to ensure total compliance with all Right of Way permitting requirements.

925: Compliance with Land Use Permitting Requirements

ITC complies with all federal, state and/or local land use permitting requirements as applicable. There are no known specific tribal permitting requirements. As a component of its telecommunications infrastructure deployment planning process, ITC communicates with local village council representatives to inform them of planned land uses, provides a map of the impacted areas, offers opportunities for feedback and if applicable, obtains a letter of non-objection for placement of network facilities.

926: Compliance with Facility Siting Rules

ITC works to ensure that all required facility siting rules, federal, state, and other are completed to the satisfaction of these governmental authorities and consistent with the needs of the Alaska Native communities.

927: Compliance with Environmental Review Processes

ITC works to ensure that all required environmental assessments, federal, state, and other are completed to the satisfaction of these governmental authorities and consistent with the needs of the Alaska Native communities.

928: Compliance with Cultural Preservation Review Process

As an Alaskan company, ITC has the highest sensitivity regarding preserving the cultural integrity of the land. Understanding that Alaska native lands are rich with artifacts and ancient burials, ITC ensures that applicable cultural preservation requirements are always followed.

929: Compliance with Tribal Business and Licensing Requirements

N/A. ITC complies with all business and licensing requirements of the State of Alaska.

Interior Telephone Company

1200: Terms and Condition for Lifeline Customers

Interior Telephone Company provides local wireline voice telephony service to eligible Lifeline subscribers.

1221: Information describing the terms and conditions of the local wireline voice telephony service offered to Lifeline subscribers by Interior Telephone Company are outlined in the tariff sheets below.

1222: Local wireline service is provided by Interior Telephone Company at a flat rate per month and includes unlimited local calling. This is the same service offered to Lifeline subscribers.

1223: Lifeline subscribers may choose to block toll access at no charge to them or choose a long distance provider of their choice for the best toll calling plans and rates available to them.

RECEIVED

STATE OF ALASKA
REGULATORY COMMISSION OF ALASKA**INTERIOR TELEPHONE COMPANY, INC.**GENERAL EXCHANGE SERVICESENHANCED LIFELINE SERVICEA. GENERAL

Enhanced Lifeline Service is a reduction in basic local service charges for residential service, available only to qualifying low income customers living on tribal lands. Qualifying customers pay reduced charges for a primary residential line as a result of the application of payments from the state and the interstate universal service funds and a waiver of the qualifying customer's end user subscriber line charge. All customers in the Company's service area are deemed to live on tribal lands.

B. REGULATIONS

1. Enhanced Lifeline Service will be offered to any requesting customer meeting the following criteria in (a) and /or (b) below:
 - a. The customer lives in a household with income at or below 135 percent of the current official Federal Poverty Income Guidelines published annually in the Federal Register by the United States Department of Health and Human Services. For purposes of applying the poverty guideline, the term "family unit" means all persons who occupy a housing unit, whether they are related to each other or not.
 - b. The customer participates in one of the following programs:
 - Supplemental Security Income (SSI)
 - Food Stamps
 - Medicaid
 - Federal Public Housing Assistance
 - Low Income Home Energy Assistance
 - Bureau of Indian Affairs general assistance
 - Tribally administered Temporary Assistance for Needy Families
 - Head Start Programs (only those meeting its income qualifying standard)
 - National School Lunch Program (free meals program only)
 - Alaska Temporary Assistance Program
 - Alaska Adult Public Assistance Program
 - VA Disability Pension
 - Child Care Assistance Program - PASS I, PASS II, PASS III
 - WIC - Women, Infants & Children Program
 - Alaska State Housing Corporation Programs

- d. The premises at which the residential service is requested is the customer's principal place of residence.
 - e. Enhanced Lifeline Service is available on the primary residential line only. The residential premises shall consist of that portion of an individual house or building or one apartment or flat occupied by a single family or individual(s) functioning as one domestic establishment.
2. Enhanced Lifeline Service shall not be disconnected for non-payment of toll charges; however, the Company may disconnect access to interexchange services should the customer not pay incurred toll charges.
 3. If the customer chooses "toll blocking" the Company will not charge a service deposit.
 4. Enhanced Lifeline Service includes the following:
 - Single party, voice grade access to the public switched network;
 - Access to emergency service;
 - Access to operator service;
 - Access to interexchange service, unless toll blocking is chosen;
 - Access to directory assistance, unless directory assistance restriction is chosen; and,
 - Toll blocking, if requested.

GENERAL EXCHANGE SERVICES

EXPANDED LINKUP ASSISTANCE

A. GENERAL

Expanded Linkup Assistance is a program for qualifying low income customers which includes a reduction in the Company's customary charge for service connection for a single residential line connection at a customer's principal place of residence, and a deferred schedule of payment of the charges assessed for commencing service, for which the customer does not pay interest. Expanded Linkup will provide a reduction to any standard charges imposed on qualifying low-income individuals as a condition of initiating service, including both line extension and initial connection charges. Expanded Linkup support provides for:

- A 100% reduction, up to \$100 of a qualifying subscriber's initial connection charges (C)
- Total maximum support amount of \$100 per qualifying low income subscriber. (C)

The supported services under this section do not include charges assessed for facilities or equipment that fall on the customer's side of the demarcation point, i.e. customer premises equipment and inside wiring charges.

B. REGULATIONS

1. Expanded Linkup will be offered to any requesting applicant meeting all the criteria as listed for Enhanced Lifeline Services.

Interior Telephone Company

3010: Milestone Certification

In compliance with 47 C.F.R. § 54.313(f)(1)(i), Interior Telephone Company includes in this filing associated with its progress report on its five-year service quality plan a letter providing a "Milestone Certification".

54.313(g) Areas with no terrestrial backhaul

Interior Telephone Company exchange areas, with the exception of Seward/Moose Pass and Cooper Landing are not connected by roads and are only fed by satellite backhaul facilities. Seward/Moose Pass and Cooper Landing have fiber middle mile access and currently support the broadband service level of 4Mbps downstream/1Mbps upstream. The village of Iliamna has both microwave and fiber middle mile access but is not connected by roads and is not able to support the broadband service level because of cost prohibitive backhaul facilities¹. Iliamna is able to support the broadband service level of 1Mbps downstream/256kbps upstream. Per the 3rd Order on Reconsideration the Federal Communications Commission has acknowledged this issue at Paragraph 46.

46. We appreciate the concerns raised by the Alaska Rural Coalition and ACS that it may not be cost-effective to serve certain customers due to the high cost of backhaul. Rather than granting a blanket exemption of the broadband obligations established for rate-of-return companies in the *USF/ICC Transformation Order*, we clarify, as the Alaska Rural Coalition requests, that our current rules provide sufficient flexibility to take into account any unique circumstances that may impact the ability of rate-of-return companies to extend broadband to their customers, including backhaul costs. As the Coalition notes, rate-of-return carriers are required to provide service meeting the specified characteristics on *reasonable* request, which, the Commission explained in the *Order*, was an obligation similar to the voice deployment obligation many of those carriers were already subject to. This obligation, enforced in the first instance by the relevant ETC-designating authority (generally the state), permits these entities to take into account backhaul costs or other unique circumstances that may make it cost-prohibitive to extend service to particular customers, in Alaska or any other area. We intend to carefully monitor developments in this regard and will consider making further clarifications or revisions if necessary.

All of Interior's other villages without terrestrial backhaul, are able to support the broadband service level of 1Mbps downstream/256kbps upstream. Interior Telephone Company continues to seek economically sound solutions to address the provisioning of required broadband speeds given the extremely high costs of middle mile transport. Unlike urban areas, due to the cost of satellite connections necessary to provide broadband to the customer, high-speed broadband cannot be unlimited. Managing the network with various service offerings is essential to promote the use and enjoyment of the Internet by all of our customers.

RE: WC Docket No. 14-58, 2016 Annual Report, Form 481 for High-Cost Recipient 47 CFR 54.313(f)(1)(i) "Milestone Certification".

Dear Ms. Dortch,

In compliance with the filing requirements associated with and attached to Form 481, Interior Telephone Company, submits certification to the Commission that it provides high speed internet service to its customers and:

- Is taking reasonable steps to provide upon reasonable request broadband service at actual speeds of at least 4 Mbps downstream/1 Mbps upstream,
- Provides broadband service with latency suitable for real-time applications, including Voice over Internet Protocol, and usage capacity that is reasonably comparable to comparable offerings in urban areas and;
- That reasonable requests for such service are met within a reasonable amount of time.

If there are any questions, I may be contacted at 1-907-563-2003.

Sincerely,

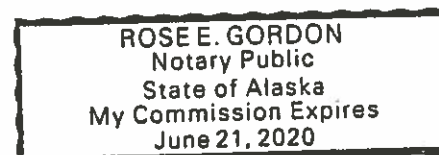

David J. Goggins
President and General Manager

Interior Telephone Company

3012: Community Anchor Institutions

In compliance with 47 C.F.R. § 54.313(f)(1)(ii), Interior Telephone Company (ITC) included in its filing of July 1, 2015 associated with its progress report on its five-year service quality plan, as a baseline, a numbered list of community anchor institutions where broadband service is available upon request.

Not all community anchor institutions where broadband service is available by ITC have requested broadband connectivity from ITC, however broadband is available to those community anchor institutions upon request.

If the community anchor institution that already subscribes to broadband service through ITC requests increased bandwidth, ITC works with the institution to determine and provision the broadband service that best fits their needs.

Community anchor institutions where service became available in 2015 include:

96	Seward	North Star Health Clinic - Chugachmiut
97	Unalaska	Ounalashka Corporation

Interior Telephone Company

3005: Rate of Return Data

3013: Interior Telephone Company is a Privately held ROR Carrier and submits below a full and complete annual report of the company's financial condition and operations as of the end of the preceding fiscal year pursuant to 47 CFR 54.313(f)(2).

3014-3019: Interior Telephone Company files as an audited single company a financial report in a format comparable to RUS Operating Report for Telecommunications Borrowers as provided by USAC in the FCC Form 481 Operating Report for Privately-Held Rate of Return Carriers upload template. This report includes data for the preceding fiscal year and the prior fiscal year for Interior Telephone Company. An officer of the company certifies the entries in this report are in accordance with the accounts and other records of the system and reflect the status of the system to the best of our knowledge and belief.

3020: A pdf of Interior Telephone Company's Balance Sheet, Income Statement and Statement of Cash Flows.

3021: Interior Telephone Company submits the Report of Independent Certified Public Accountants, Grant Thornton, LLP, that performed Interior Telephone Company's financial audit.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Board of Directors
Interior Telephone Company, Inc.

We have audited the accompanying financial statements of Interior Telephone Company, Inc., which comprise the balance sheets as of December 31, 2015 and 2014, and the related statements of income, changes in stockholder's equity, and cash flows for the years then ended, and the related notes to the financial statements.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Interior Telephone Company, Inc. as of December 31, 2015 and 2014, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.
